CRE Space Intelligence — Pre-Build Requirements

Everything Needed Before Development Begins

Prepared by Manus AI for CREEL Solutions LLC Date: March 9, 2026

> *This document captures every decision, credential, design choice, and business rule that must be confirmed before a single line of code is written. Answering these questions completely ensures the application is built correctly the first time and is ready for testing without rework. Items marked **[REQUIRED]** will block the build if unanswered. Items marked **[RECOMMENDED]** have a suggested default that will be used if no answer is provided.*

SECTION 1 — Product Identity & Brand

These decisions affect the app name, domain, logo, color palette, and every screen a broker will see.

#	Question	Status	Your Answer
1.1	**[REQUIRED]** What is the final product name? (e.g., “SpaceFit AI,” “TourFit,” “DealFit,” “SpaceIQ”)	Unanswered	
1.2	**[REQUIRED]** What is the one-line tagline brokers see on the landing page and login screen?	Unanswered	
1.3	**[REQUIRED]** Do you have a logo file ready? If yes, provide it as a PNG with transparent background. If no, should a logo be designed as part of this build?	Unanswered	
1.4	**[RECOMMENDED]** Primary brand color (hex code). *Default: Deep navy #0F1F3D with electric blue accent #2563EB — professional, tech-forward, CRE-appropriate.*	Unanswered	
1.5	**[RECOMMENDED]** Visual style preference: (A) Dark/professional, (B) Clean white/minimal, © Bold/modern with color. *Default: Option A.*	Unanswered	
1.6	**[REQUIRED]** What is the confirmed domain name for the app? (e.g., spacefit.ai, tourfit.com) Has it been purchased?	Unanswered	
1.7	**[REQUIRED]** What company name and legal entity should appear in the app footer, terms of service, and invoices? (e.g., “CREEL Solutions LLC”)	Unanswered	
1.8	**[RECOMMENDED]** Should the app support broker white-labeling (broker’s own logo/name on exported reports)? *Default: Yes, included in Team and Enterprise plans only.*	Unanswered	

SECTION 2 — Target User & Core Workflow

These decisions define who the app is built for and the exact sequence of steps they take.

#	Question	Status	Your Answer
2.1	**[REQUIRED]** Primary user type: (A) Tenant rep broker, (B) Office leasing/landlord rep broker, © Both equally. This affects the language, default room types, and budget benchmarks built into the AI.	Unanswered	
2.2	**[REQUIRED]** Confirm the intended use context: Is this tool used (A) during the property tour on a phone, (B) after the tour on a desktop, or © both — phone for capture, desktop for analysis?	Unanswered	
2.3	**[REQUIRED]** What is the primary geographic market at launch? (e.g., US only, US + Canada, global) This affects currency, unit of measurement (sq ft vs sq m), and budget benchmarks.	Unanswered	
2.4	**[RECOMMENDED]** Default unit of measurement: (A) Square feet, (B) Square meters. *Default: Square feet (US market).*	Unanswered	
2.5	**[REQUIRED]** Walk through the exact broker workflow you envision, step by step. What does the broker do first, second, third — from opening the app to sending something to a client? (Free-form answer)	Unanswered	
2.6	**[RECOMMENDED]** Should the app support multiple active projects per broker simultaneously (e.g., 5 different properties being analyzed at once)? *Default: Yes, unlimited projects per account.*	Unanswered	

SECTION 3 — Floor Plan Capture (The Core Technology)

These decisions define how the proprietary camera measurement system is built.

#	Question	Status	Your Answer
3.1	**[REQUIRED]** Confirm the two-mode capture system: **Mode A** (video walkthrough with printed calibration marker) and **Mode B** (upload existing PDF/image floor plan). Should both be available at launch, or Mode B only first?	Unanswered	
3.2	**[REQUIRED]** For Mode A (video scan): The broker must print a calibration marker (an 8.5”×11” branded sheet) and place it in the space before recording. Is this workflow acceptable, or is a marker-free approach required? *(Note: marker-free reduces accuracy by 10–15%.)*	Unanswered	
3.3	**[RECOMMENDED]** For Mode A video upload: Maximum video length accepted. *Default: 3 minutes (sufficient for spaces up to ~30,000 sq ft).*	Unanswered	
3.4	**[RECOMMENDED]** Target processing time for Mode A (from video upload to floor plan returned): *Default: Under 90 seconds.* Is this acceptable, or is a faster/slower target needed?	Unanswered	
3.5	**[REQUIRED]** For Mode B (plan upload): What file types should be accepted? (PDF, JPG, PNG, DWG/CAD files?)	Unanswered	
3.6	**[RECOMMENDED]** After a floor plan is generated or uploaded, should the broker be able to manually edit it (move walls, add/remove rooms, adjust dimensions) before running the AI test-fit? *Default: Yes — a simple drag-and-drop editor is included.*	Unanswered	
3.7	**[REQUIRED]** What is the minimum and maximum square footage the tool is designed to handle? (e.g., 500 sq ft minimum, 100,000 sq ft maximum) This affects the AI model configuration.	Unanswered	

SECTION 4 — Tenant Program Input (AI Interpretation)

These decisions define how the broker enters the tenant’s space requirements.

#	Question	Status	Your Answer
4.1	**[REQUIRED]** How should the broker input the tenant's program? Choose all that apply: (A) Free-text description ("We need 20 private offices, 2 conference rooms…"), (B) Structured form with dropdowns and number fields, © Upload a tenant requirements document (PDF/email) and let AI extract the program, (D) All three.	Unanswered	
4.2	**[REQUIRED]** What are the standard room/space types that should be in the system by default? (e.g., Private office, Open workstation, Conference room, Phone booth, Reception, Break room, Server room, Storage, Restroom) Please confirm this list or add/remove items.	Unanswered	
4.3	**[RECOMMENDED]** Should the AI suggest a program based on the tenant's industry and headcount if the broker doesn't have full details? (e.g., "Tech company, 50 employees" → AI recommends a typical program.) *Default: Yes.*	Unanswered	
4.4	**[RECOMMENDED]** Should the system store tenant programs so a broker can reuse them for future analyses? *Default: Yes — saved as "Program Templates."*	Unanswered	

SECTION 5 — AI Test-Fit Generation (The Core AI Engine)

These decisions define what the AI produces and how it presents options.

#	Question	Status	Your Answer
5.1	**[REQUIRED]** How many layout options should the AI generate per analysis? (1, 2, or 3 options showing different configurations — e.g., “Collaborative,” “Private,” “Hybrid”)	Unanswered	
5.2	**[REQUIRED]** Should the layouts be displayed as: (A) 2D floor plan drawing (blueprint style), (B) Simple color-coded diagram, © Both.	Unanswered	
5.3	**[RECOMMENDED]** Should the AI calculate and display a **space efficiency score** for each layout (usable sq ft vs. total sq ft)? *Default: Yes.*	Unanswered	
5.4	**[RECOMMENDED]** Should the AI flag if the space cannot accommodate the tenant’s program, and suggest the minimum square footage required? *Default: Yes — this is a key broker value-add.*	Unanswered	
5.5	**[REQUIRED]** Should furniture be shown in the layouts? (Desks, chairs, conference tables, etc.) Or just room boundaries and labels?	Unanswered	
5.6	**[RECOMMENDED]** Should the broker be able to lock certain rooms (e.g., “Reception must be near the entrance”) before the AI generates layouts? *Default: Yes — basic constraints input.*	Unanswered	

SECTION 6 — Budget Estimator

These decisions define the financial analysis output.

#	Question	Status	Your Answer
6.1	**[REQUIRED]** What budget outputs should the tool produce? Choose all that apply: (A) Total estimated build-out cost (low/mid/high range), (B) Cost per square foot, © Category breakdown (construction, furniture/FF&E, IT/AV, soft costs), (D) Monthly rent cost based on layout, (E) Total occupancy cost (rent + build-out amortized).	Unanswered	
6.2	**[REQUIRED]** What data source should drive the build-out cost estimates? (A) Fixed national averages built into the app, (B) City/market-specific benchmarks, © Allow broker to input their own $/sq ft estimate, (D) All three with broker override option.	Unanswered	
6.3	**[RECOMMENDED]** Should the budget be displayed as a range (e.g., 85–120/sq ft) rather than a single number, to account for market variability? *Default: Yes — range is more defensible and professional.*	Unanswered	
6.4	**[RECOMMENDED]** Should the tool include a **Tenant Improvement (TI) allowance calculator** that shows net cost to tenant after landlord contribution? *Default: Yes — critical for tenant rep brokers.*	Unanswered	

SECTION 7 — Output, Export & Client Sharing

These decisions define the deliverable a broker sends to their client.

#	Question	Status	Your Answer
7.1	**[REQUIRED]** What should the exported client report include? (Floor plan, layout options, space efficiency score, budget estimate, broker contact info, property address, date) Confirm or modify this list.	Unanswered	
7.2	**[REQUIRED]** Export format: (A) Branded PDF, (B) Shareable web link (client views online without logging in), © Both.	Unanswered	
7.3	**[REQUIRED]** Should the exported report carry the broker's name, photo, company logo, and contact details? (White-label broker branding)	Unanswered	
7.4	**[RECOMMENDED]** Should the broker be able to add written notes or commentary to the report before sending? *Default: Yes — a "Broker Notes" text field on each layout.*	Unanswered	
7.5	**[RECOMMENDED]** Should the client be able to view multiple properties side-by-side in a comparison view via the shared link? *Default: Yes — "Property Comparison" is a premium feature.*	Unanswered	
7.6	**[RECOMMENDED]** Should the app track when a client opens a shared report (read receipts)? *Default: Yes — brokers love knowing when a client has engaged.*	Unanswered	

SECTION 8 — Subscription, Pricing & Billing

These decisions drive the entire monetization architecture.

#	Question	Status	Your Answer
8.1	**[REQUIRED]** Confirm pricing tiers: **Professional $149/mo**, **Team $129/user/mo**, **Enterprise custom**. Or provide revised pricing.	Unanswered	
8.2	**[REQUIRED]** Free trial: Yes or No? If yes, how many days, and is a credit card required to start the trial?	Unanswered	
8.3	**[REQUIRED]** Should there be a usage limit on any plan? (e.g., Professional plan = 20 analyses/month, unlimited on Team/Enterprise) Or is it fully unlimited on all paid plans?	Unanswered	
8.4	**[RECOMMENDED]** Annual billing discount: Should brokers be offered a discounted annual rate? *Default: 2 months free (equivalent to ~17% discount) for annual prepay.*	Unanswered	
8.5	**[REQUIRED]** Should there be a **referral program** at launch? (e.g., "Refer a broker, get 1 month free")	Unanswered	
8.6	**[REQUIRED]** Stripe account: Do you have a Stripe account already set up under the CREEL Solutions LLC entity?	Unanswered	

SECTION 9 — User Accounts & Access Control

These decisions define how brokers sign up, log in, and manage their teams.

#	Question	Status	Your Answer
9.1	**[RECOMMENDED]** Sign-up method: (A) Email + password only, (B) Google SSO only, © Both. *Default: Both — Google SSO dramatically increases sign-up conversion.*	Unanswered	
9.2	**[RECOMMENDED]** For Team accounts: Should a team admin be able to see all projects created by their team members? *Default: Yes — admin has full visibility, individual brokers see only their own.*	Unanswered	
9.3	**[RECOMMENDED]** Should brokers be able to share a project with a colleague (e.g., a co-broker) even if the colleague is not on the same subscription? *Default: View-only sharing via link, edit access requires a paid seat.*	Unanswered	
9.4	**[REQUIRED]** Should there be a separate **admin dashboard** for you (the owner) to see all users, subscriptions, usage, and revenue?	Unanswered	

SECTION 10 — Integrations & Connected Tools

These decisions define what the app connects to.

#	Question	Status	Your Answer
10.1	**[REQUIRED]** GoHighLevel (GHL): Should new user sign-ups automatically be pushed into GHL as a contact and trigger an onboarding email sequence? If yes, provide your GHL API key.	Unanswered	
10.2	**[RECOMMENDED]** Should the app send automated in-app and email notifications? (e.g., “Your floor plan is ready,” “Your client viewed the report”) *Default: Yes — email via Supabase/Resend, in-app notifications.*	Unanswered	
10.3	**[RECOMMENDED]** Google Analytics or similar: Should user behavior be tracked for product improvement? *Default: Yes — anonymous usage analytics via built-in Manus analytics.*	Unanswered	
10.4	**[REQUIRED]** Should the app integrate with any CRE data platforms at launch? (e.g., CoStar, LoopNet, Buildout) Or is this a future phase?	Unanswered	

SECTION 11 — API Keys & Credentials Needed at Build Time

These must be provided before the build begins. None of these are stored by Manus — they are injected as secure environment variables.

#	Credential	Purpose	Status
11.1	**[REQUIRED]** OpenAI API Key	Powers all AI features — program interpretation, layout generation, plan analysis, budget estimation	Not provided
11.2	**[REQUIRED]** Stripe Publishable Key + Secret Key	Subscription billing and payment processing	Not provided
11.3	**[RECOMMENDED]** Google OAuth Client ID + Secret	Enables “Sign in with Google” on the login page	Not provided
11.4	**[RECOMMENDED]** GHL API Key	Pushes new sign-ups into GoHighLevel for automated onboarding sequences	Not provided
11.5	**[RECOMMENDED]** Resend API Key (or SendGrid)	Transactional emails — welcome, plan ready, report viewed notifications	Not provided
11.6	**[RECOMMENDED]** AWS Access Key ID + Secret (S3)	Stores uploaded floor plans, videos, and generated PDFs	Not provided

---

SECTION 12 — Legal & Compliance

These decisions affect the terms of service, privacy policy, and data handling.

#	Question	Status	Your Answer
12.1	**[REQUIRED]** Should the app include a Terms of Service and Privacy Policy at launch? If yes, should these be auto-generated based on the app's data practices, or do you have existing documents to use?	Unanswered	
12.2	**[REQUIRED]** Floor plan data uploaded by brokers — is this considered confidential client data? Should it be automatically deleted after a set period (e.g., 90 days) or retained indefinitely?	Unanswered	
12.3	**[RECOMMENDED]** Should the app include a disclaimer on all AI-generated budget estimates stating they are approximations and not professional cost estimates? *Default: Yes — protects CREEL from liability.*	Unanswered	
12.4	**[RECOMMENDED]** GDPR compliance (for any EU users): Is this a concern at launch, or is the initial market US-only? *Default: Include basic GDPR cookie consent banner as a precaution.*	Unanswered	

SECTION 13 — Testing & Launch Criteria

These decisions define what "ready to test" and "ready to launch" mean.

#	Question	Status	Your Answer
13.1	**[REQUIRED]** Who are the beta testers? How many brokers will test before public launch, and how will they be recruited?	Unanswered	
13.2	**[REQUIRED]** What does a successful test look like? Define the specific actions a tester must complete successfully for the app to be considered ready. (e.g., “Upload a floor plan, enter a program, generate a test-fit, export a PDF”)	Unanswered	
13.3	**[RECOMMENDED]** Should there be an in-app feedback button during beta so testers can report issues directly? *Default: Yes.*	Unanswered	
13.4	**[REQUIRED]** Target launch date or timeline. (e.g., “Ready to test in 4 weeks, public launch in 6 weeks”)	Unanswered	

Summary: Required Items That Block the Build

The following **11 items are hard blockers** — the build cannot proceed correctly without them:

Priority	Item	Why It Blocks the Build
🔴 1	Product name (1.1)	Affects every screen, URL, database name, and deployment
🔴 2	Tagline (1.2)	Required for landing page and onboarding screens
🔴 3	Domain name (1.6)	Required for deployment and OAuth configuration
🔴 4	Legal entity name (1.7)	Required for terms, invoices, and Stripe setup
🔴 5	OpenAI API Key (11.1)	Without this, zero AI features function
🔴 6	Stripe Keys (11.2)	Without this, no subscription billing
🔴 7	Primary user type (2.1)	Determines room types, budget benchmarks, and AI prompts
🔴 8	Workflow confirmation (2.5)	Defines the entire app navigation and screen sequence
🔴 9	Capture mode decision (3.1)	Determines which scanning engine to build first
🔴 10	Pricing confirmation (8.1)	Required to configure Stripe products and subscription tiers
🔴 11	Test-fit output format (5.1, 5.2)	Determines the visualization engine and rendering approach

---

Once these questions are answered, a full technical specification and screen-by-screen wireframe description will be produced for final confirmation before the build begins.
